

## **Possibility Summer Activities Mondays, Wednesdays, and Fridays**

On Mondays, Wednesdays, and Friday mornings at Possibility Summer, students will have the opportunity to have fun while learning. Students will work individually and in cooperative groups in the areas of Math, Science, Reading, Writing, Geography, and other subjects. Emphasis will be placed on reviewing concepts students have previously learned while guiding them through new learning. Students will also have a time of Bible study each morning with a common theme throughout the summer. After lunch, students will have a more relaxed environment with games and activities. Part of the afternoon will also contain free play time.

## **Possibility Summer Field Trips & Activities Tuesdays and Thursdays**

Tuesdays and Thursdays at Possibility Summer are our structured activity days. Some of the activities we will have for your children are water play days, bouncers in the gym, movie days, food and cooking lessons, drama & musical activities. We will also venture off campus for field trips from time to time.

More detailed information and an exact schedule of events will be available in the beginning of June. Feel free to contact us with any questions you may have.
